events & technology

Products & Services 2014

We believe that technology is just a tool, an useful and convenient one, that allows us to enhance our capacities : we have to use it to get the best of us.

We really love to help you to achieve that goal and so we will walk along with you to get the maximum of your events.

Our portfolio of products and services is aimed at helping to convert yours in a different kind of meeting.

¿ How to integrate technology solutions to events, meetings and other events to give added value to them ?

Screens and AV Systems

iPad and Apple Rental

Creating a marketing action, showing your portfolio or catalogue,organise a Team Building strategy or give them to your delegates to use during the trip or event are just a few examples of what you can do with the most advanced tablet in the world.

We are specialised in Apple Hardware, so you can also have MacBook and iMacs at your disposal. We are also Apple Certified Technicians so we can help you with the installation and deployment of the devices.

IT Services

Technology you can trust

We can provide and assist you with all the services you need to turn your technological event into a complete success.

- Customisation of devices, kiosk mode for demonstrations.
- Wifi infrastructures; you can even have an Internet connection in the middle of nowhere, using a satellite link
- Installation and deployment of large number of devices
- On-site assistance and support

Recording and streaming LIVE events

Conferences, seminars, meetings, from a conference hall to a small room... there are many reasons to record your event: from showing your skills to start your own video channel, you can use it to promote your upcoming sessions as well as to improve your communication with the audience. Once converted into a video, it can be made accessible to who could not attend via You Tube, Vimeo or any other channel or store them for future reference.

We have of the best professionals for recording your session and its subsequent broadcasting.

Quizpad, the challenge

Compete with your colleagues for the highest score.

Respond to questions, guess, think up...

You can play with questions related to images, video clips or music in your competition.

Be the smartest and the fastest, there is a prize for you!

Rental of Interactive Touch Screens and AV Systems

If you want to convert your stand or reception in a permanent center of attention and stand out from the rest, you should use our attractive and interactive touch tables where you can show applications, PDFs or videos, even a game where several people can play at the same time.

Create an irresistible experience for all your visitors showing your content. In addition, we provide, install and assist you with all AV equipment you need (Sound systems, DJs and related, LCDs, Totems, projectors and others)

iPresenter, interactive presentations

Convert your presentations, meetings or training sessions in a new and enriching experience.

Ask questions, get answers, launch challenges, create surveys, tempt your audience and make them participate. Take the opportunity to generate discussions, gather impressions, rate ideas all in real-time.

It's very easy! Three steps and you will captivate them.

Come to visit us and we show you how...

Charging&Sync Suitcases for multiple tablets

Charge and synchronise easy and efficiently a large number of tablets.

Available in different formats and capabilities. Adaptable to all models.

Intelligent USB Hub for the simultaneous management of multiple devices. Inner space for Wireless Access Point and Laptop. Trolley model for easy carrying. Available also in drawer and cart format.

CongressOnTheGo: Native app for congress management

All your congress in the palm of your hand. With our platform CongressOnTheGo you can manage any kind of conference, being the perfect tool for planning all your events.

Post the event's agenda, program alerts so you do not miss a session, see information about the speakers, capture the poster and listen to the author explaining their project. Orient yourself with the included map.

- post your conferences and ensure success
- centralise all information about your conference in one application.
- provide information related to presentations and speakers, exhibitors, calendar, interactive location maps with useful data and other relevant information.
- communicate in advance any change of schedule to your audience and get assessment of the presentations made.
- interactive maps, customisable agenda, document management and more.
- scan the QR code to get a poster explanatory and a speech recorded by the author himself.

The abstracts or summaries books are now also incorporated into the application, separated by categories, author and keywords, making easier their search.

Available for iOS and Android

Aerial Drone Recording

And if your event takes place outdoors, you should think seriously about an aerial recording that will offer you a truly shocking perspective.

A drone allows a point of view and a capacity of manoeuvre that will make your recording something unique.

Stand out with an innovative and spectacular production.

Come and fly with us !

Thank you for your time
